Silver Layer Outputs

Silver Table	Built From	Purpose
`silver_customer`	customer	Cleansed customer master
`silver_policy`	policy + insurance_product + agent	Enriched policy information
`silver_premium_payment`	premium_details + payment_schedule	Payment & premium analytics
`silver_campaign_customer`	campaign + campaign_customer	Campaign conversion dataset
`silver_telecaller_activity`	telecaller + telecaller_activity	Telecaller performance dataset

1. Silver_customer.csv

    Source: customer.csv

    Transformations

    - Remove duplicates
    - Standardize city/region
    - Calculate Age
    - Keep only active customers

2. Silver_policy.csv

    Source: policy + insurance_product + agent

    Transformations

    - Join Product Master
    - Join Agent Master

- Standardize policy status
- Enrich with region

3. Silver_premium_payment.csv

Source: premium_details + policy_payment_schedule

Transformations

- Merge API responses
- Calculate outstanding amount
- Calculate overdue days
- Derive lapse date

4. Silver_campaign_customer.csv

Source: campaign + campaign_customer

Transformations

- Join campaign master
- Standardize lead status
- Derive conversion premium

5. Silver_telecaller_activity.csv

Source: telecaller + telecaller_activity

Transformations

- Join telecaller master
- Standardize outcomes
- Calculate conversion flag

Gold Layer

#	Gold Dataset	Primary Business Question
1	`gold_campaign_kpis`	Which campaigns generated policies and premiu
2	`gold_telecaller_kpis`	Which telecallers performed best?
3	`gold_policy_lapse`	Which policies are at risk of lapse?
4	`gold_policy_maturity`	Which policies are approaching maturity?
5	`gold_customer_360`	What is the complete relationship with each customer?
6	`gold_policy_kpis`	What is the overall health of each policy?

1. Gold_campaign_kpis.csv (Campaign Performance Dashboard)

   Source: silver_campaign_customer + silver_telecaller_activity + silver_policy

   Business Purpose

   - Measures campaign effectiveness and policy conversion.

   Important transformations

   ```
   conversion_rate =
        policies_converted / customers_targeted * 100

   avg_premium_per_conversion =
        Premium_generated / policies_converted
   ```

2. gold_telecaller_kpis.csv (Telecaller Performance Dashboard)

   Source: silver_telecaller_activity + silver_campaign_customer + silver_policy

3. gold_policy_lapse.csv (**Policy Lapse Report**)

Source: silver_policy + silver_premium_payment + silver_customer

Business Purpose

- Measures campaign effectiveness and policy conversion.

Important transformations

```
IF outstanding_amount = 0
    → LOW
ELSE IF days_overdue > grace_period_days
    → HIGH
ELSE IF days_overdue > 0
    → MEDIUM
ELSE
    → MEDIUM
```

4. gold_policy_maturity.csv (Policy Maturity Report)

Source: silver_policy + silver_customer

Important transformations

Maturity Bucket
0-30 DAYS
31-60 DAYS
61-90 DAYS
90+ DAYS

5. gold_customer_360.csv (Customer 360 Report)

   Source:

   Customer 360
   Customer segmentation
   Premium collection
   Campaign targeting
   Cross-sell / upsell
   Lapse prevention

6. gold_policy_kpis.csv (single policy-level analytical view)

   Source: Policy Maturity + Customer 360
